

1. Localization issue. The zip code doesn't correspond to Santa Monica. If the search was done using this zip code, it should say "39 matches for Tiguan in Beverly Hills". If the search was performed through a website form where the model "Tiguan" and the city "Santa Monica" were specified, it should show zip code 90404 instead of the nearest dealer's zip code.
2. The right place for "Visit Dealer's Site" is below each search result since cars can be found at various dealers, and currently, they only recommend purchasing from one
3. The car brand is missing. The position titles contain the car model, but not the brand.
4. No photo
5. Vin number stacking issue
6. The photo didn't upload
7. € instead of \$. The currency should be in \$ as this is an American website.
8. Misspelling in "seats"
9. Alignment issue
10. List is empty
11. Ukrainian text instead of English
12. Alignment issue
13. Misspelling in "Transmission"
14. Should be "in"
15. The font size is too small
16. Inconsistent text font weight in the listing heading
17. "39" should be bold
18. 19. 20. Inconsistent font weight and size in the "There are 39 matches for Tiguan at Santa Monica". It's advisable to review all fonts and elements in general to ensure consistency and coherence throughout the design.
